

Support For

Siblings

For brothers or sisters of
children with learning
disabilities/autism

Greenwich Mencap provide fun sessions for primary school aged children during the school holidays where siblings can play, make and create together. There's time to chat and share experiences with other children.

The sessions aim to help if things sometimes get a bit too much for them or they would like a chance to spend time with other children with similar experiences.

Information is available for children to take home if they feel they need it. The sessions are free.
